Start

Take turns to roll the dice and move around the board. Collect a penny every time you land on a happy face. If you land on a sad face you must put 1p back. The aim of the game is to get enough 1ps to exchange for another coin. For example, when you have two 1ps, you can exchange these for a 2p coin, similarly with 5p and 10p coins. The first person to have a 2p, 5p and 10p coin is the winner!
