

HOW TO MAKE COLOURED SALT

YOU WILL NEED:

- Salt
- Food Colouring
- Ziploc Bags

STEP ONE: Add the desired amount of salt to a Ziploc bag.

STEP TWO: Add food colouring to the bag. The more food colouring, the more saturated your colours.

STEP THREE: The most important step! Press out all the air from the bag and securely close it. The last thing you want is a bag of exploded food colouring and salt all over your house!

STEP FOUR: Knead the salt and food colouring until it is all mixed together. Waiting to mix everything a minute or so after adding the food colouring makes for less colouring clumps and an easier mixing process.
