

My Home Toss Event

Throw the object 10 times and record your distances below:

Throw Number	How many feet?
1	
2	
3	
4	
5	
6	
7	
8	
9	
10	

Use your results to answer the questions below:

1. What was the **shortest** distance you threw?

2. What was the **longest** distance you threw?

Can you think of another object we could use to measure the distance of our throws? Why don't you try it and compare your results?!
